

RowControl™

—
Easy Upgrade to More Control

Return on investment gets that much easier when it's an investment you already own.

With Elliott's **RowControl™** products, your John Deere planter can take on new life. If you run John Deere Pro-Shaft Drives, you already know the power of flexible shafts. With Elliott's **RowControl**, you can extend the life of your planter while adding individual on/off row control via our proprietary clutch technology.

Use **RowControl+** if you're looking to upgrade from chains and sprockets. You can choose **RowControl+** with or without a clutch for a long-lasting maintenance-free solution to your planter upgrade.

Ask your dealer about Elliott's **RowControl** products today.

Elliott's RowControl Features

- ➔ Available in clutched and non-clutched configurations
- ➔ Easy to install
- ➔ Maintenance-free
- ➔ No additional row unit modifications required—just plug-and-plant
- ➔ Easily integrates via existing FieldView II wiring harness

RowControl with Clutch
