

SurfaceDrive™

Higher Yields at a Lower Cost

At Elliott Manufacturing we know it's how well you plant that determines how good this year is going to be.

So we've taken Elliott's **FlexSeeder™** solution one step further. Our **SurfaceDrive** assembly easily attaches to your existing **vSet™** seed meter for accuracy and reliability never before seen on a mechanical system. And **SurfaceDrive** offers on/off row control using Elliott's proprietary clutch technology.

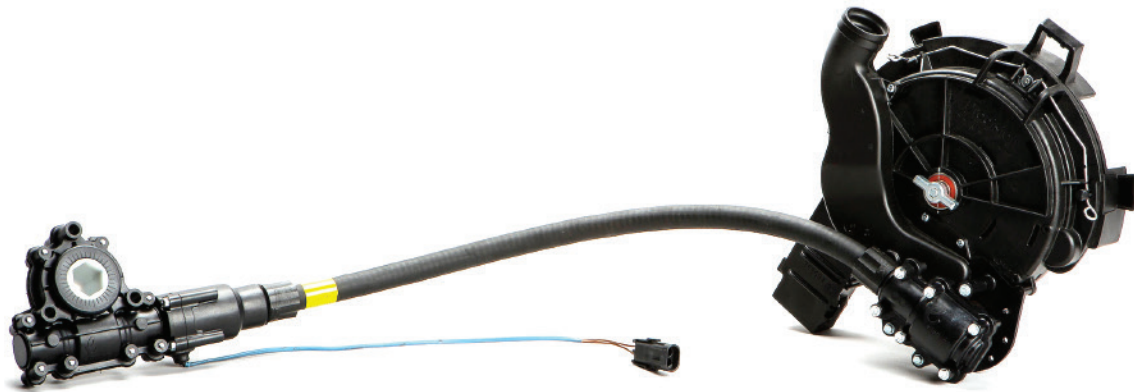

With **SurfaceDrive**, you can be confident that today's seeds are tomorrow's plant stands with that classic "picket fence" look. All for a price that pays back quickly through repeatable seed singulation and higher overall yields.

Ask your dealer about Elliott's **SurfaceDrive** today.

Elliott's SurfaceDrive Features
